# NAUTIZ X5

## Packed with performance

The Nautiz X5 is a versatile PDA that delivers a category-leading combination of performance features in a small but rugged package. The Nautiz X5 is designed to provide everything you need for optimum in-the-field computing performance – a total package of unmatched capabilities in a rugged format.

First, the Nautiz X5 is fast and powerful. Its high-speed 806 MHz Xscale processor, 256 MB RAM and 512 MB Flash memory is unsurpassed – this is a mobile computer can keep up with you. And it's easy to use and practical. With Windows Mobile 6.1, a full VGA screen, and a battery that lasts more than a full workday on a single charge this handheld takes desktop computing efficiency out into the field.

The Nautiz X5 is also a feature-rich device. It comes standard with integrated 3 mega-pixel camera with autofocus and LED flash. Also standard are integrated Bluetooth and 802.11 b/g with WPA2 encryption for improved security and CCX certification for better interoperability. The Nautiz X5 has options for 3G cellular (voice and data), a 1-D laser or 2-D imager bar code scanner and GPS with SiRF Instant Fix II capability that provides position computation in seconds.

Finally, this handheld is tough and mobile enough to take anywhere. An IP65 rating means the Nautiz X5 is impervious to dust and highly water-resistant, and it can withstand drops from 6 feet and operate in a wide range of temperatures. It weighs less than 14 ounces and fits comfortably in your hand.

The Nautiz X5 brings together the latest features and technology to deliver a mobile handheld device that does it all, and does it well.
